

Relative integrated coastal risk associated with compound wave-surge events

Rank	Municipality	Index
1	Chaves (PA)	0.583
2	Calçoene (AP)	0.473
3	Icatu (MA)	0.454
4	Tracuateua (PA)	0.433
5	Amapá (AP)	0.419
6	Humberto de Campos (MA)	0.416
7	Primeira Cruz (MA)	0.414
8	Cajapió (MA)	0.399
9	Maracanã (PA)	0.397
10	Pacatuba (SE)	0.397

Interpretation caveat

The index is relative/comparative.
A municipality can have relevant
physical coastal hazards while ranking
lower after social vulnerability weighting.

Formula

Risk_Hazard =
 $(SVI_Coast_2022 / 100) \times Hazard_Index$
